PROJECTS

TechMart — Electronics E-commerce Platform

May 2026 – Aug 2026

React, Next.js, Node.js, Express, MongoDB, TanStack Query | Live: tech-mart-six.vercel.app | GitHub: github.com/afsarriyad/techMart

- Built a full-stack e-commerce platform with user authentication, cart, wishlist, order management, and an admin dashboard.
- Implemented centralized API handling with TanStack Query and Axios interceptors, enabling automatic token refresh and consistent error handling across the application.

Slate — Corporate Website

Jun 2026 – Jun 2026

React, React Router, Tailwind CSS | Live: slate-business-website.vercel.app | GitHub: github.com/afsarriyad/Group-Project

- Led a team to design and build a multi-section corporate website within a 3-day deadline, coordinating merge reviews, resolving conflicts, and maintaining design consistency across contributors.
- Managed the GitHub workflow (branching, code review, merge approval) and identified and fixed bugs and design inconsistencies under a tight deadline.
